SECOND AIR INTERNAL PNEUMATIC BEADLOCKS

For tank-like traction, there's no substitute for Second Air

In the past 12 months Australian 4WD Monthly magazine has tested more gear than in any previous year. That made the short list for best product of the year swell to gargantuan proportions, in all categories. For the best product under \$250 we had a stock of gear to choose from we couldn't go past the internal pneumatic beadlocks from SecondAir. What we like about SecondAir was the unique bead-lock system that secures not just one but both tyre beads to the wheel using an inflatable tube and casing.

They will not effect wheel balance like external beadlocks and require only simple modifications to existing rims to fit. Although we tested a set of 15x10 bead-locks, SecondAir are available in various sizes and retail from just \$195 a piece. Congratulations to Roger Smith of SecondAir for an exceptional product, a well deserved winner of the Australian 4WD Monthly Product of the Year Award. SecondAir internal pneumatic beadlocks are available from leading 4WD accessories stores nationwide. Contact SecondAir (03) 5426 1835 or 0428 106 847 or visit www.secondair.com.au for more information.
